

**ABSTRACT OF THE DISCLOSURE**

5       A suet bird feeder system for efficiently providing suet plugs for birds to  
consume. The suet bird feeder system includes a housing unit having at least one  
opening with a rear wall and a straight or tapered inner wall, a support member  
extending from the rear wall, and a suet plug having a tapered sidewall formed to fit  
within the opening. A storage tray preferably has a plurality of storage cavities having  
10 a tapered structure for receiving and storing the suet plugs prior to insertion within the  
opening.
